

Examination of Steam Receivers

Overview

Steam receivers must be examined by personnel authorized by the Department of Occupational Health and Safety (DOHS) at least once (1) within every twenty six (26) months period. This process is intended to minimize the risk of explosions or other malfunctions possible for pressure vessels. Operators who do not adhere to this standard are liable for a fine. Operators must keep the official report, logging each inspection, on the same premises as the equipment in question and it must be made available DOHS personnel for inspection at any time.

Who is eligible?

Individuals and organizations which own and operate steam receivers.

How do I get this service?

- Operators must hire the services of an authorized examiner from the list of authorized examiners. This list is updated throughout the year.
- Once an inspection by an authorized examiner has taken place, the examiner is required by law to issue a report to the operator detailing and assessing the state of the equipment in question.
- This report must be kept in the official log of the operator and available for inspection by DOHS personnel.

What supporting documents are required?

- An inspector may require the owner to produce documents proving ownership of the equipment being examined
- The official assessment report is the sole documentation required for the DOHS

How long will this service take?

One (1) working day.

How much does it cost?

- BWP 15 for steam receiver of diameter 800mm or over
- BWP 8 for steam receiver of diameter less than 800mm and steam receivers of circular shape respectively

The fine for non-compliance is BWP 100 or imprisonment for a term not exceeding two (2) months or to both
